New Flower Novelties for Florists

While introductions have been limited, you will find those listed below of particular merit.

Aster, Ballet Queen

Bodger introduction for 1948. This latest addition to the Queen of the Market class is excellent for florist use. Extremely double and quite wilt-resistant, it's a money making crop for cut flower growers. The color is new. Deep rose touched with salmon, assuming a soft bronze color when many flowers are massed together in sunlight. Early and free-flowering, it is fine for home gardens as a border plant. Tr. pkt., 40c; $\frac{1}{4}$ oz., 75c; oz., \$2.75.

Aster, Ballet Queen

Cosmos, Radiance

Winner of the highest award in the 1948 All-America trials. Radiance introduces two entirely new colors in Sensation Cosmos: Striking deep rose and rich crimson, in the first bi-color Cosmos ever to be developed. Destined for immediate popularity in the nation's gardens. Tr. pkt., 25c; $\frac{1}{4}$ oz., 60c; oz., \$2.00.

Cosmos, Sensation, Radiance

New Dwarf Ruffled Petunia "Garden Giants"

The outstanding feature of this new variety is its satisfactory plant growth. The plants uniformly develop into well rounded mounds 12 to 15 inches high. They start flowering when extremely small and continue their gorgeous display all through the summer, holding their size and ruffling even under the adverse conditions of heat and dryness. Because of its uniformity and continuous blooming, it is by far the best variety of Giant Ruffled Petunias for borders we have ever seen. The mixture includes a wide variety of bright color combinations. Tr. pkt., \$1.00; $\frac{1}{32}$ oz., \$3.50.

Petunia Hybrid Nana Compacta "Glowing Rose"

The intense brilliance of this new Petunia makes it the most startling of all the dwarf bedding varieties. The individual flowers are much larger than Celestial Rose and of an even shade that, with us, held its intense color right up until the last flowers. The plants are of the same well-rounded, mound shape as Celestial Rose and of an unusual uniformity, at no time becoming unshapely. Tr. pkt., 40c; $\frac{1}{16}$ oz., \$1.00; $\frac{1}{8}$ oz., \$1.50.

Verbena Hybrid Grandiflora "Salmon Pink" (New Bush Type)

The plants grow more erect, making a broad, flat topped, bushy plant about 8 to 10 inches high and 12 to 15 inches across, with the flower heads practically touching each other. A row of them makes an even and uniform band or border closely covered with flowers over a very long blooming season.

The flower heads are large and well filled with large broad-petalled flowers of an unusually pleasing shade of bright salmon-pink, each with a small white eye. Tr., pkt., 35c; $\frac{1}{8}$ oz., 60c; $\frac{1}{4}$ oz., \$1.10.

Petunia, Ruffled Garden Giants

Any of the above 5 varieties, trial pkt., 25c each.
